POWDER HOUSE BLOWS UP.

On May 8 there was a severe explosion at Pihakapuka. The day before the powder-house slid down into the gulch. On the day of the explosion one of the men at work removing the powder threw the butt of a cigarette in the debris and the powder caught fire. The warning cry of "powder" rang out and everybody skurried away. The expected explosion took place but luckily no one was seriously injured. It was a close call for some of those employed about the building. The explosion was felt in the surrounding country for miles. A number of people were knocked down by the concussion and a good deal of glass broken. Everything on the bluffs of the gulch that was in the way of the explosion was swept away for some hundreds of feet up to the cane fields. The young sugar cane in the direction of the explosion was all burnt up. No one happened to pass on the public road at the time, or something else would have happened.—Kohala Midget.

\$40,000 PER MILE COST BY DECISION

(Continued from Page 1) every other appearance or appliance by them required in the construction, equipment, operation and maintenance of said railway * * *

"Railway" in the act is defined in Section 835 as follows: "Railway" shall refer to and mean the tracks, rails, roadway, with its appurtenances, appliances and connections to be placed in streets, roads or places on the Island of Oahu," etc.

Taking these two sections together, President Peck and other officials are firmly of the opinion that they have more control over their own roadway than is the holding under the Supreme Court decision yesterday.

In its syllabus the court says: "The duty imposed on the street railway company by Section 838, R. L., to pave or macadamize the portions of the streets occupied by its tracks whenever the other portions of the streets are paved or macadamized is not limited to original construction, but requires the company to lay a pavement corresponding with a new pavement laid down by the proper governmental authority though the portion of the street occupied by the company had previously been macadamized."

"Under Section 864, R. L. the duty is imposed on the street railway company to pave its portion of the street so as to conform to a new pavement laid down on the rest of the street by the city and county of Honolulu, whether the duty is enjoined by Section 828, R. L., or not. The word 'government' includes street improvements made by the municipality."

"The obligation of the street railway company as to paving is defined and fixed by the franchise act. The superintendent of public works has no discretion to authorize or direct the laying of a pavement of a kind different from that used by the government."

"The necessity for repaving the streets is to be determined by the governmental authorities having charge of such work. And in prescribing the kind of pavement to be used the authorities are not limited to that which was in ordinary use at the time of the granting of the franchise."

"Notice to the railway company that it shall conform to a patented bitulithic pavement laid upon a concrete foundation put down on a certain section of King street, in Honolulu, by the municipal authorities does not constitute an unreasonable requirement. It not appearing that the cost would be excessive or that the owner of the patent contemplated exacting conditions other than payment of the price of the material and the cost of laying the pavement, and no claim being made that the pavement was not an approved one, or that the action of the municipality in laying it was in any way improper or inappropriate, though nearly one-half of the life of the franchise had expired, and at the end of the term of the franchise the ties could be taken up only with much difficulty."

This case, brought by the Honolulu Rapid Transit & Land Co. against the Territory of Hawaii and Marston Campbell, superintendent of public works, was decided yesterday, the decision being written by Chief Justice Robertson and concurred in by Justices Perry and De Bolt.

It is a friendly suit brought by the company to determine its rights in the matter of paying between its tracks through the streets and in repaving when the original highway covering has worn out. The contenders agreed upon the submission of facts.

One of the important features of the decision, attorneys say, is the rule laid down that may involve conflicts between municipal and Territorial authorities in the deciding of future cases. The decision says that the word "government" includes improvements made by the municipality.

Chairman Samuel Dwight of the city and county road committee appeared to be well satisfied with the Supreme Court decision handed down in the matter of street paving between tracks and right of way of the Honolulu Rapid Transit company, in which the franchise must pave between its tracks with the same material as that used by the municipality.

"The road committee will consult with the city and county attorney's department in regard to what steps, if any, shall be taken, now that a decision has been handed down," stated Dwight this morning.

"I am pleased at the victory won by the city and county. It should mean that King street, upon which the city has expended nearly \$16,000, will yet be placed in presentable shape."

The city fathers many months ago appropriated funds and let a contract to the local bitulithic concern to pave King street from the river to Nuuanu street. This work was done in the time agreed upon between the contractor and the city, but a strip of eighteen feet in width yet remains unpaved and has in wet as well as dry weather proved a great source of annoyance to traffic as well as business firms along that thoroughfare.

The city also is keenly alive to the merits of the decision in that it will also apply to the proposed pavement of Queen street. The street railway company operates a line of cars along the entire length of the thoroughfare, soon to be paved with block or bitulithic.

EDITOR KINNEY HERE ON TRIP

Editor Henry W. Kinney of the Hilo Tribune arrived this morning on the Mauna Kea for a short business trip, and will return to the Big Island next Tuesday. Mr. Kinney has left his editorial desk temporarily to handle a big publicity scheme for the Island of Hawaii, under the auspices of the Hilo Board of Trade.

He has already started on the collection of pictures and statistics for a promotion booklet. It will contain much "booster" stuff for the Big Island and will be profusely illustrated. The book will be put on sale at a moderate price—low enough to insure its wide distribution and high enough so that every copy will go into responsible hands.
